Portfolio:

PROFESSIONAL SUMMARY

Software Engineering graduate with practical experience in web development, database management, business analysis, and enterprise IT. Skilled in PHP, Laravel, MySQL, JavaScript, Bootstrap, SQL, Python, and C#, with a strong interest in Software Engineering, Data Science, Business Intelligence, and AI.

PROFESSIONAL EXPERIENCE

Software Engineering & Network Intern

(Ceylon Petroleum Corporation (CPC) — Head Office, IT Function) 2026 – Present

- Contribute to internal web application development using **Laravel, PHP, MySQL, JavaScript, Bootstrap, and Vite**, including an Inventory Management System.
- Analyze business requirements and translate operational needs into system features, workflows, database structures, and CRUD functionality.
- Support **enterprise IT operations**, including networking, troubleshooting, technical support, system documentation, and collaboration with IT staff and business users.

- Participate in inventory verification activities at **Sapugaskanda Refinery**, gaining practical exposure to asset identification, inventory management, and industrial operations.

Agency Administrator

Cargills Ceylon — Veyangoda Agency, Divulapitiya | Oct 2024 – Sep 2025

- Managed order processing, including order placement, acceptance, tracking, documentation, and system updates.
- Coordinated with **sales, inventory, and logistics teams** to support accurate and timely order fulfillment.
- Maintained order records, delivery documentation, tracking information, and **Good Receipt Notes (GRN)** while communicating with internal and external stakeholders.

ADDITIONAL EXPERIENCE

Software Engineering Tutor & Mentor

Self-Employed / Independent | 2026 – Present

- Provide academic and technical guidance to Software Engineering students in software development and project work.
- Support students with **Requirements Engineering, UML, system design, databases, project planning, testing, and technical documentation.**
- Explain complex technical concepts through practical examples while encouraging independent learning and problem-solving.
- Provide constructive feedback on software projects, documentation, diagrams, presentations, and technical solutions.

EDUCATION

BEng (Hons) Software Engineering

London Metropolitan University, England

Sep 2024 – Sep 2025 | Upper Second-Class Honours (2:1)

Developed a strong foundation in software engineering, including software development, requirements analysis, system design, databases, programming, testing, and application development.

Pearson BTEC Level 5 HND in Software Engineering

Esoft University, Gampaha

Sep 2022 – Sep 2024

TECHNICAL SKILLS

Programming: C#, PHP, JavaScript

Web Development: Laravel, HTML5, Bootstrap, Vite

Database & Data: MySQL, SQL, Database Design, CRUD Operations

Software Engineering: Requirements Engineering, System Analysis, UML, Software Development Lifecycle, Testing, Documentation

Other: Git, Networking, IT Support, Technical Troubleshooting

PROFESSIONAL INTERESTS

- Software Engineering
- Web Application Development
- Business Analysis
- Quality Assurance
- Data Science
- Business Intelligence
- Artificial Intelligence
